for your upcoming project.

Furman Land Surveyors, Inc.

Corporate Overview

Donald Furman began surveying while stationed in Alaska during his service in the United States Army. He later relocated to Amarillo, Texas where he worked in the City of Amarillo Surveying Department. Mr. Furman then joined Jimmie Nail and Co. While employed at Jimmie Nail, Donald Furman attended West Texas State University where he received a Bachelor of Science degree in Industrial Education. He also became a Registered Public Surveyor while working at Jimmie Nail and Co. The years that followed saw Jimmie Nail and Co. become Nail, Furman and Associates, as Don became a partner in the firm. The firm later became Furman-Keys Land Surveyors, when Don and a partner bought out Jimmie Nail. In January of 1984 Donald Furman started his own firm, now Furman Land Surveyors, Inc.

Furman Land Surveyors, Inc. has experienced excellent growth since its inception in 1984. The addition of sons Daryl and Daniel added fuel to this growth by bringing a sense of pride to the family business. The dedication of father and sons, and a commitment to provide the highest quality surveying services possible in a timely manner has helped Furman Land Surveyors Inc. become the firm that they are today.

In an effort to expand our archive of survey data, Furman Land Surveyors, Inc. purchased Golladay & Associates Land Surveyors in December 2008, SEDCO surveyors in December 2009, Roger Lamb & Associates surveyors in July 2014, APEX Surveying and Mapping in July 2015, Titus Land Surveying, Inc. in September 2015, Thomas & Israel Consulting Engineers in January 2017, and Keller Surveying & Mapping in October 2017.

Through the use of new technology and constantly bettering our service, Furman Land Surveyors, Inc. is committed to continue providing quality services to our clients.

Experience

Furman Land Surveyors, Inc. has a vast amount of experience surveying in the five state area, and has completed projects for private individuals, large corporations, utility companies, and pipeline companies, on both public and private lands.
